

Introduction to Machine(Deep) Learning

Dr. Alejandro Veloz

Overview

- When and where to use DL
- “How” it works
- Frontiers of DL

What is Deep Learning

Good old Neural Networks, with more layers/modules

What is Deep Learning

Good old Neural Networks, with more layers/modules

Non-linear, hierarchical, abstract representations of data

What is Deep Learning

Good old Neural Networks, with more layers/modules

Non-linear, hierarchical, abstract representations of data

Flexible models with any input/output type and size

Why Deep Learning Now?

- Better algorithms & understanding

Why Deep Learning Now?

- Better algorithms & understanding
- Computing power (GPUs, TPUs, ...)

Why Deep Learning Now?

- Better algorithms & understanding
- Computing power (GPUs, TPUs, ...)
- Data with labels

Why Deep Learning Now?

- Better algorithms & understanding
- Computing power (GPUs, TPUs, ...)
- Data with labels
- Open source tools and models
